of Messengers  
and Neobanks

# About Project

## Mission

We strive to create a new generation blockchain-based messenger, which will provide users with the highest possible level of security, anonymity, and ease of communication. Our goal is to ensure complete protection of personal data and freedom in the exchange of information without fear of interference by third parties.

## Vision

Creating a world, where everyone can freely communicate and share information in a secure environment while maintaining their rights to privacy and freedom of speech. We strive to return the Internet to its original purpose – the free and anonymous exchange of information.

# Our Main Features

## Convenient and Secure Crypto Wallet

Crypto-fiat wallet facilitates secure, private and convenient transactions. With it, users can effortlessly transfer tokens and exchange coins directly from their chats

## Private Bank Card

Enhanced with cutting-edge encryption, it acts against data theft, and facilitate integration with digital wallets and cryptocurrency platforms, offering a payment solution

## Blockchain Messenger

Blockchain messenger offers a secure way to communicate without revealing personal details. Private chat rooms and one-time tokens (OTT) guard your confidentiality

# Disadvantages of modern messengers

The messenger market is rapidly growing, yet data security remains a major concern. Your messages, photos, personal data, all of this can be stolen, sold or even worse. That's why we created Fasqon.

**A new level  
of your private life**

				
Identification by seed phrase				
Built-in crypto wallet -support of major cryptocurrencies				
Sending messages (including file forwarding)				
Automatic message deletion				
Metadata encryption				
No collection and use of user data				
No advertising				

# Why Choose Fasqon?

Our blockchain messenger encrypts and sends messages using blockchain technology, making it unhackable, similar to the security found in cryptocurrencies, but convenient in use.

Don't need a phone number or email

Encrypt your messages with blockchain

You choose how long your messages are stored

Private bank card without personal data provision

Fasqon doesn't collect user data

# Blockchain Messenger

P2P coin swap between users using a smart contract.

Invitation to private rooms and message sending with a unique OTT

Encrypted P2P audio calls without intermediate servers

Secure Communication

Defined lifespan, visibility, and capacity for rooms

Unlimited Accounts

Creation of trading and informational bots

Business Infrastructure

A user composes a message

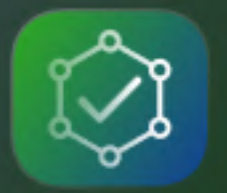

The message is encrypted using cryptographic techniques

A block that represents the message is created

The block is sent to every node in the network

Nodes validate the message

Nodes receive a reward for the proof of work

A block is added to the existing Blockchain

The message reaches the recipient

Recipient decrypt it with their private key

# Fasqon is an Ecosystem

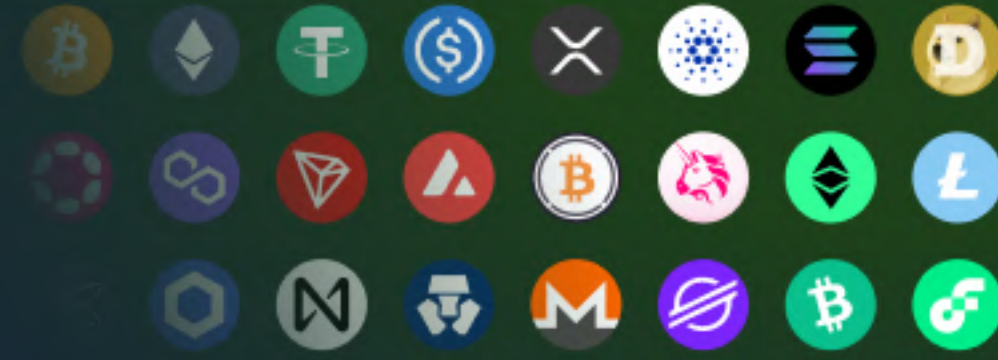

Is a platform for secure and reliable interaction. It is a foundation for a society based on trust, respect, and the protection of personal data

# Fasqon Crypto Wallet

**01**

**Cryptocurrency storage**

Users can securely store various cryptocurrencies in the messenger's built-in wallet, providing convenient access to their assets.

**02**

**Sending and receiving tokens**

The built-in wallet allows users to easily send and receive cryptocurrency tokens directly from the messenger, simplifying the process of exchanging funds between chat participants.

**03**

**Secure P2P coin swap in chat**

Direct exchanges of cryptocurrency with use of smart contracts in the Fasqon's blockchain network, ensuring fast and transparent transaction without intermediaries.

**04**

**Security and privacy**

The built-in wallet provides a high level of security and privacy, using modern encryption and protection methods to secure users' funds.

**05**

**Portfolio management**

Users can track the status of their portfolio, view transaction history, and manage their cryptocurrency assets, all from the messenger's convenient interface.

# Private Bank Cards

These tangible cards blend the best of the physical and digital worlds, allowing you to use them anywhere, just like any regular card, but with the benefit of complete privacy.

Integrated with the Fasqon blockchain messenger, these cards allow users to send and receive transactions even via the chat!

**In today's world, where privacy is luxury, private bank cards offer a new level of financial discretion!**

# Who is Fasqon for?

## Privacy-Conscious Individuals

Perfect for those who value privacy and want to keep their communications and transactions confidential.

## Cryptocurrency Enthusiasts

Ideal for those who manage and transact with digital assets frequently, ensuring secure and anonymous transactions.

## Freelancers and Remote Workers

Convenient for receiving payments in crypto, converting to fiat, and making payment in any country.

## Media and Journalists

Ensures true anonymity for sources while protecting sensitive information and identities.

## Activists and Dissidents

Provides secure communication and fund transfers, crucial for those under oppressive regimes.

## Businessmen and Specialists

Essential for securely sharing sensitive business information and protecting corporate data, as far as funds transferring.

# FSQN Token Distribution

- FSQN is a BEP20 token issued on the **Binance Smart Chain (BSC)**
- Initial circulating supply: **17,500,000 FSQN (1.75%)**
- Maximum number of tokens that can be burned: **50%**

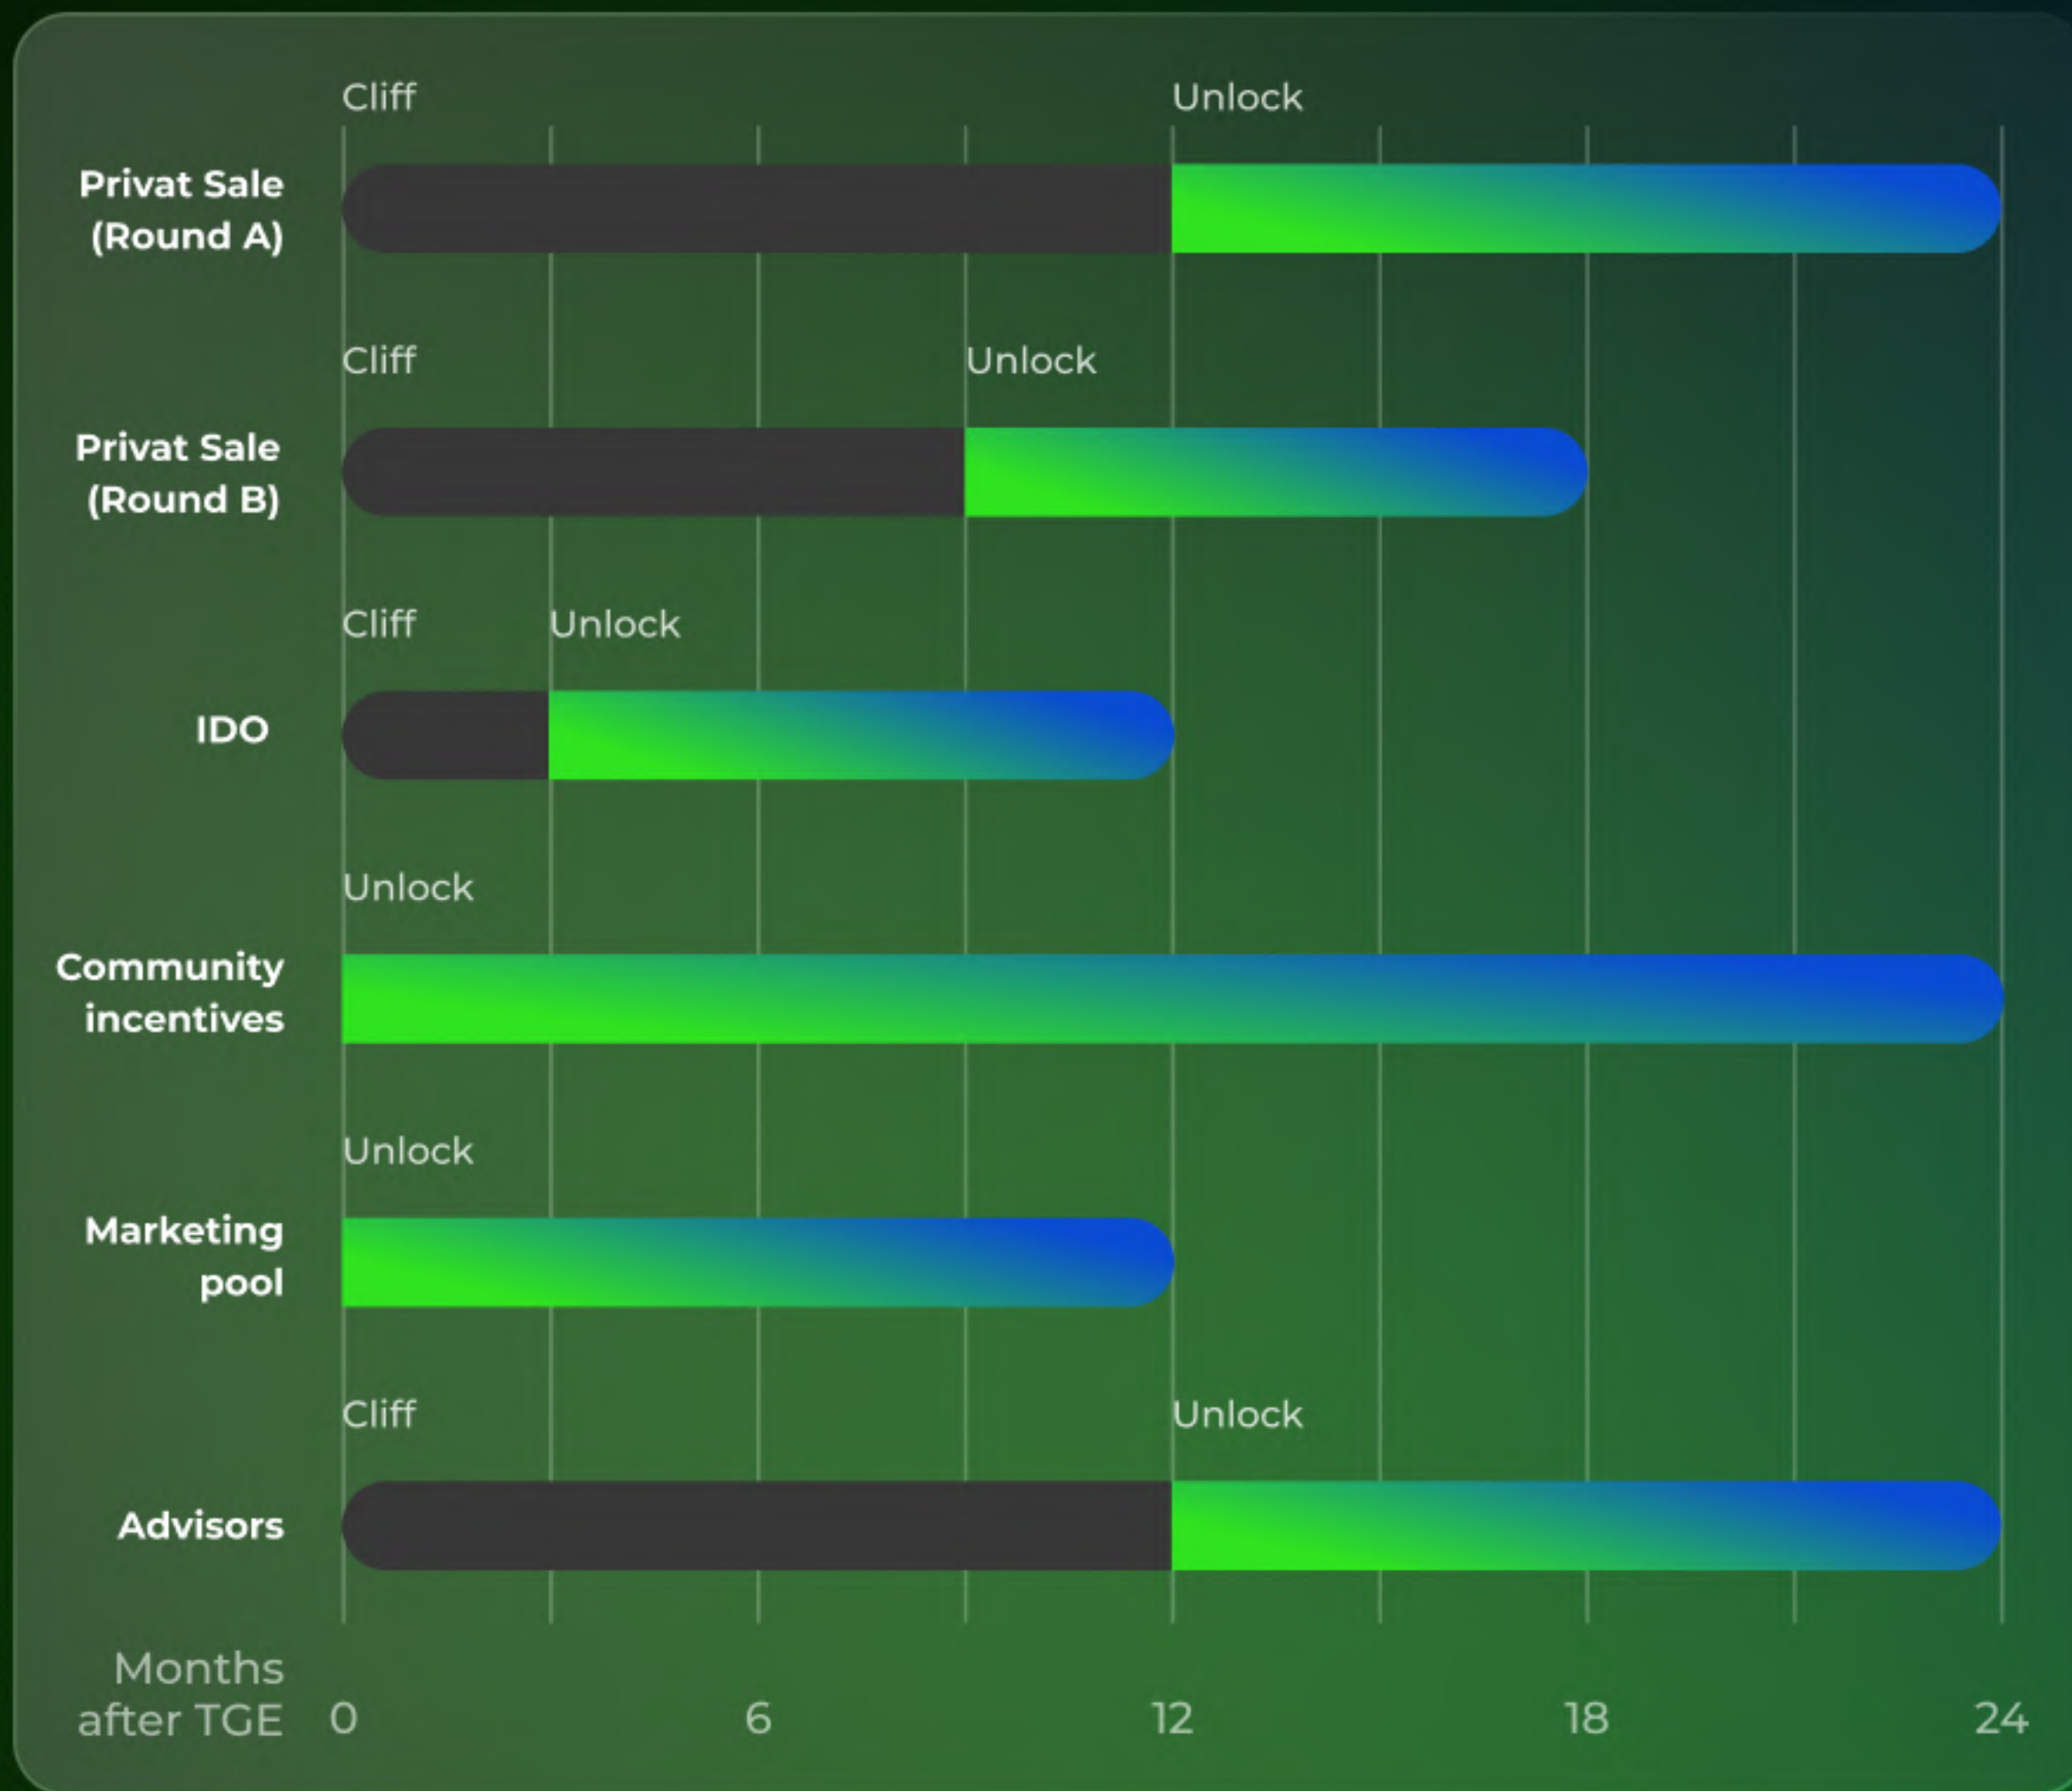

**1,000,000,000**  
**Total emission of tokens**

# Token Unlock Schedule

## Use of Funds

15% Liquidity Reserve

5% Infrastructure

30% Marketing

10% Diverse Expenses

30% Development

30% PR

**PRIVATE SALE (ROUND A)**

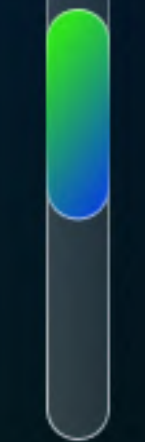

Number of Tokens	30 000 000
Token Price	\$0.01
Cliff After	12 months
Unlock During	12 months

**PRIVATE SALE (ROUND B)**

Number of Tokens	50 000 000
Token Price	\$0.015
Cliff After	6 months
Unlock During	12 months

**IDO ROUND**

Number of Tokens	150 000 000
Token Price	\$0.03
Cliff After	3 months
Unlock During	9 months

# Road Map

## 1. Current State

Project Initiation

## 2. Future plan (1 year of work)

- Launch of the Fasqon messenger
- Prototype development and testing
- Improving functionality
- Testing

## 3. Development desktop and mobile applications

- Mobile applications
- Desktop version

## 4. Testing and release (2 year of work)

- Functional and security testing
- Release

## 5. Promotion and monetization

- Marketing strategy
- Monetization strategies
